

INFORMATION FOR EXHIBITORS AND STAND BUILDERS

BOLOGNA EXHIBITION CENTRE

ACCESS FOR BOOTHS SET UP AND DISMANTLING

The access of vehicles to the Fairgrounds will be allowed from the “Michelino” entrance. Temperature screening will be carried out at the entrance. Anyone with a body temperature of more than 37.5 degrees Celsius will be denied entry. All those allowed to enter will receive an authorization bracelet valid for that day. This procedure must be repeated every day on entering the Fairgrounds.

The pedestrian entrance is positioned at the main visitors entrance. Temperature screening will be carried out at the turnstiles where all PASS badges will be scanned. Anyone with a body temperature of more than 37.5 degrees Celsius will be denied entry.

Entrance to the Fair both at via Michelino vehicles' entrance or at the pedestrian entry point will be allowed only on presentation of a personal PASS. Personal passes must be obtained from the online PASS registration system. All those who are not in possession of a personal PASS badge will be denied entry to the Fairgrounds.

On entering the Fairgrounds, face masks must be worn correctly (covering both nose and mouth) at all times, including in the outdoor areas between the halls. Anyone refusing to wear a mask correctly shall be asked to leave the venue.

Pedestrians and vehicles entry points have been arranged so as to separate employee/supplier/operator – exhibitor/visitor flows and to guarantee that a distance of at least 1 m between each person is maintained. Supervisory staff will be on duty at the entry routes and in the areas of high-density pedestrian traffic to ensure compliance of such norms.

In order to guarantee overall safety and ensure a successful, enjoyable tradeshow, visitors, exhibitors and operators are warmly invited to comply with the widely publicized national regulations as well as with the specific health and safety measures introduced by the trade show organisers.

Hand-sanitising gel dispensers have been made available throughout the Exhibition Centre. Clear signage indicating the health and safety measures to be followed by visitors, exhibitors and all operators is visible in all areas.

EXHIBITORS ' ACCESS DURING DAYS OPEN TO VISITORS

Exhibitors with a vehicle pass allowing entrance to the Fairgrounds must also show their personal badge (EXHIBITOR PASS) at the Michelino vehicles entrance, the only vehicles entrance in operation. Any passengers in the vehicle will also have to undergo temperature screening. Entry will be denied in the event of the exhibitor failing to produce a personal pass, or if his/her body temperature is above 37.5 degrees Celsius.

Exhibitors entering on foot from any of the public access routes will follow the same procedure as visitors: temperature screening and personal pass scanning. Entry will be denied in the event of the exhibitor failing to produce a personal pass, or if his/her body temperature is above 37.5 degrees Celsius.

Masks must be worn correctly (so as to cover both nose and mouth) in all areas of the tradeshow (including outdoor areas between the halls) during the full duration of the event. Anyone refusing to wear the face covering correctly shall be asked to leave the venue.

Hand-sanitising gel dispensers have been made available throughout the Fairgrounds. Clear signage indicating the health and safety measures to be followed by visitors, exhibitors and all operators is visible in all areas.

THE PASSES ISSUED FOR EACH PHASE OF THE EVENT ARE STRICTLY PERSONAL
