

POSITIVE RESULTS FOR THE WATER&ENERGY PLATFORM
H2O, CH4, HESE-Hydrogen Energy Summit&Expo, ConferenzaGNL, Fuels Mobility and Dronitaly all
offer encouraging signs for the ecological transition

ALMOST 7000 ATTENDEES

NEXT APPOINTMENT IN 2022 IN BOLOGNA

The exhibition platform that focused on the topic of Water&Energy concluded with attendance numbers reaching almost 7000: a three-day event during which highly qualified professional operators were able to encounter innovative proposals from the exhibiting companies and discuss matters of current importance at more than 40 conferences.

A result that sends a strong and convincing signal from a compartment that is assuming an ever-greater importance, given the growing attention to environmental questions that the pandemic emergency has accentuated. The exhibition platform proposed, at the same time, **H2O, CH4, HESE-Hydrogen Energy Summit&Expo, ConferenzaGNL, Fuels Mobility and Dronitaly**: a network of events that brought together all the protagonists in the sector. Companies, national and international experts, institutions and utilities were able to meet and discuss the development of new synergies and projects for the future.

The network will return in October 2022 with the exhibition and conference platform **BolognaFiere Water&Energy** proposed by the new joint venture between **BolognaFiere and Mirumir**. H2O will return in 2023 in its traditional format as the International Water Exhibition, while next year it will take the form of Focus H2O, specialising in the topic of water.

APPOINTMENT IN BOLOGNA FROM 12 TO 14 OCTOBER 2022
